HIMANSHU SHARMA

Bhubaneswar, Odisha | himanshusharmazen@gmail.com | +91 9555839597 | GitHub | LinkedIn | Portfolio

EDUCATION

B.Tech in Computer Engineering — International Institute of Information Technology, Bhubaneswar
CGPA: 7.95 | 2023 – 2027
Class 12 (ISC Board) — Dr. Virendra Swarup Memorial Public School, Kanpur | 94%
Class 10 (ICSE Board) — Dr. Virendra Swarup Memorial Public School, Kanpur | 96%

TECHNICAL SKILLS

Languages: JavaScript (ES6+), C++, Python
Web Development: React, Node.js, Express.js, HTML5, CSS3, TailwindCSS
Databases: MongoDB, PostgreSQL, Supabase
Tools & APIs: Git, GitHub, Socket.io, REST APIs, Async Programming, Postman
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks

PROJECTS

CodeRace — Real-Time Multiplayer Coding Race Platform | *React, Node.js, Socket.io, Monaco Editor, OneCompiler API (RapidAPI), Gemini API, Supabase* GitHub |

- Built a dynamic real-time web application for 1v1 multiplayer coding races, delivering a seamless user experience through WebSocket event-driven architecture with Socket.io for live room synchronization
- Developed and integrated backend APIs and services — wiring OneCompiler API (via RapidAPI) for multi-language code execution and Monaco Editor for a performant in-browser IDE experience across Python, C++, and Java
- Integrated Gemini API to build an AI-powered hint system with penalty-based scoring, enabling intelligent assistance while maintaining competitive fairness; implemented fallback logic for offline play
- Optimized application for real-time reliability by tracking live match state (test cases passed, submission status, countdown) across concurrent users without exposing opponent code

Stash-It — Cross-Device File & Snippet Sharing Platform | *React, Node.js, Express.js, Socket.io, WebRTC, Supabase Storage, TailwindCSS* GitHub | Live Demo |

- Built a full-stack file and snippet sharing platform supporting Cloud Stash (Supabase Storage) and Direct Link mode using WebRTC peer-to-peer file transfer
- Implemented Socket.io-based signaling with STUN/TURN servers to establish direct peer connections, enabling secure chunked file transfer with real-time progress, speed, and ETA tracking
- Developed RESTful backend APIs for file management, unique share keys, expiration-based access control, signed URLs, and responsive cross-device user experience

Sudoku Engine — Algorithmic Puzzle Game | *React, JavaScript, TailwindCSS* GitHub | Live Demo |

- Implemented a Sudoku puzzle generator using a backtracking algorithm with solution-count verification to guarantee each generated puzzle has exactly one valid solution
- Built difficulty-tiered puzzle generation (Easy / Medium / Hard) by controlling the number of pre-filled cells, alongside real-time input validation, hint system, and undo functionality

ACHIEVEMENTS & CERTIFICATIONS

- Solved 500+ DSA problems across LeetCode and GeeksforGeeks, consistently practising problems across arrays, graphs, DP, and trees
- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional — applied knowledge of LLMs, prompt engineering, and AI-powered application development [verify]
- Oracle Cloud Infrastructure 2025 Certified Architect Associate — cloud architecture and deployment fundamentals [verify]
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate [verify]
- HackerRank Software Engineer Role Certification — validated proficiency in problem-solving, data structures, and algorithms [verify]
